

Curriculum vitae

Roberta Roncarati

PERSONAL DATA:

Date of birth	May 15,1970
Birth place	Ferrara, Italy
Home Address	via Barbantini n.15 Ferrara, 44123 Italy Cell 393 194 8729
Work Address	CNR-IRGB- UOS Milan Milano 20138 Italy <i>Since 2012 c/o University of Ferrara (agreement CNR-IRGB-UNIFE) CUBO Experimental Medicine Prof. M. Negrini Laboratory of Next generation Sequencing</i> E-mail: roberta.roncarati@cnr.it roberta.roncarati@gmail.com roberta.roncarati@irgb.cnr.it roberta.roncarati@unife.it

<https://orcid.org/0000-0002-2371-3316>

EDUCATION BACKGROUND:

2009-present

Tenured researcher
CNR- IRGB, Milan
Genetic of Cardiovascular disease
Molecular Oncology

2007-2009

PhD in Molecular Medicine
University of Milan
“Genetics of Cardiomyopathy ”

2004-2007

Tecnobios prenatale
Diagnostica prenatale e postnatale

Bologna, ITALY

2002-2004	Scientist in Cellular Immunology AVENTIS Pharmaceuticals, Immunology Platform, Bridgewater, NJ, USA.
2000-2002	Post Doctoral Fellow Laboratory of Luciano D' Adamio, MD PhD Department of Microbiology and Immunology Albert Einstein College of Medicine Bronx, NY, USA
1999-2000	Post-Doctoral Fellow: Unit of Gianluigi Condorelli, MD PhD by Dr Croce C.M. Laboratories at Kimmel Cancer Center Thomas Jefferson University, Philadelphia, PA, USA
1998-1999	Self -sponsored scientist Laboratory of Antonio Giordano, MD, PhD Thomas Jefferson University Philadelphia, PA, USA
1995-1996	Internship: Dept. of Pharmacy University of Ferrara, School of Pharmacy, Ferrara, Italy
1990-1997	Degree in Pharmaceutical Chemistry, School of Pharmacy, Ferrara, Italy.
1984-1989	Marco Polo High School, Ferrara

LABORATORY SKILLS:

- 2 years of extensive in vivo murine experience including breeding, crossing and maintaining colonies, working with transgenic mice (model of cardio deficiency, and transgenic mice carrying genes involved in the regulation of apoptosis under a cardiac-specific promoter).
- 4 years of Molecular biology techniques: DNA and RNA isolation and analysis (Gel electrophoreses, molecular cloning, PCR, site directed mutagenesis, Southern Blotting and Northern Blotting,);

- Protein isolation, affinity purification of tagged proteins, Western Blotting; In Vitro Translation Transcription
- Cell cultures: mammalian cell transfection, Immunoprecipitation, GST Pull Down, analysis of transient gene expression by CAT -assay, Luciferase assay and β-galactosyde assay, Rna interference (temporary gene knock out in cell Lines), some experience in preparation of primary neuronal culture.
- Some experience with Immunocytochemistry.
- Isolation of: PBMC from whole human blood, preparation of T cell line (mouse and human). Proliferation assay: with H3-Thymidine incorporation and with CFSE labeling technique. Study of Th1/Th2 cytokine assay with CBA test and with Luminex assay, ELISA assay. 4-Color Flow Cytometry.

Pre-natal and post-natal Diagnosis of genetic disease: DNA amplification technique (PCR) and fragment analysis using GENSCAN system and sequencing (Cistic Fibrosis: CFTR gene amplification and direct sequence of exon 7, 10 and 20; Fragile X syndrome: FMR1 gene amplification; Nonsyndromic deafness mutations in connexins 26: GJB2 gene amplification)

Professional Experience (last 10 years):

Use of novel approaches, including Next Generation Sequencing (NGS) real time PCR, and digital PCR (Biorad ddPCR):

- 1) DNA (cfDNA) obtained from "liquid biopsies" to study **circulating and genetic biomarkers of cardiovascular diseases and clinical cancer disease** which may be used to predict disease state or response to specific drug treatments;
- 2) DNA(biopsy) of patients for gene mutation discovery and epigenetic study.

NGS Platform used: Illumina NextSeq 550; Ion Torrent: PGM and Ion S5, Ion Chef System

1-Library preparation from Tissue and from Liquid Biopsy (plasma/serum from blood of patients; bronchial washing in lung cancer patients);

2-Target panel Ion Torrent: The Oncomine Pan-Cancer Cell-Free Assay; Ion AmpliSeq Comprehensive Cancer Panel; Oncomine Cell-Free Assays for Liquid Biopsy Clinical Research (Breast and Lung cancer)

3- Target custom panel sequencing (DNA Methylation study)

4- Whole exome sequencing (**WES**); Whole genome sequencing study (**GWAS**) study design, SNP prior SNP Prioritization and validation (in familial disease)

5-Micro RNA library preparation (Illumina) and **sequencing**

Biospecimens:

- Liquid biopsy : cfDNA/RNA investigation for mutation detections;

- Bronchial washing (Lung cancer): for diagnostic purposes (gene mutation study, gene fusion, and target therapy and therapy resistance);
- Plasma(cfDNA/RNA), for library generation and NGS sequencing
- Plasma (exosomes and microvesicles): microRNA expression studies using NGS
- Bronchial washing :DNA methylation study (ddPCR and NGS)

Research Appointments

2009/2012

PI: Laboratory of Cardiovascular Genetics
 CNR c/o IRCCS Mutimedica
 Via Fantoli 16/15 Milan

2012-present

Collaboration with Prof. Massimo Negrini Lab's
 Diagnostic markers in oncology
 Department of Morphology, Surgery and Experimental Medicine,
 University of Ferrara,
 44121, Ferrara , Italy

Project Support

Ministry of Heath : Ricerca Finalizzata 2014-2017

Project Code: RF-2011-02348194

Applicant Institution: IRCCSMultiMedica Milano

Project Title: *Innovative diagnostic approach for hereditary cardiomyopathies*
